PURPOSE:

The intent of this clinical policy is to capture a comprehensive list of CPT and HCPCS codes for new/emerging technology/*health care services* that are designated as excluded until the Plan determines if *reliable evidence* permits conclusions concerning its safety, effectiveness, or effect on health care outcomes.

Please refer to the member's benefit document for specific information. To the extent there is any inconsistency between this policy and the terms of the member's benefit plan or certificate of coverage, the terms of the member's benefit plan document will govern.

POLICY:

The Plan assesses *medical literature* to determine if new technology or the application of existing technology associated with a *health care service* is proven effective by *reliable evidence*.

Health care services with *reliable evidence* that supports their safety and efficacy may be eligible for coverage according to the member's benefit plan.

Benefits must be available for *health care services*. *Health care services* must be ordered by a provider. *Health care services* must be medically necessary, applicable conservative treatments must have been tried, and the most cost-effective alternative must be requested for coverage consideration.

COVERAGE:

CPT and HCPCS codes for new/emerging technology/healthcare services that require precertification/prior authorization.

This includes whether a drug or device can be lawfully marketed for its proposed use by the FDA; or if the drug, device or medical treatment or procedure is under study or if further studies are needed to determine its maximum tolerated dose, toxicity, safety or efficacy as compared to standard means of treatment or diagnosis; and
2. Whether there are consensus opinions or recommendations in relevant scientific and medical literature, peer-reviewed journals, or reports of clinical trial committees and other technology assessment bodies. This includes consideration of whether a drug is included in any authoritative compendia as identified by the Medicare program such as, the National Comprehensive Cancer Network Drugs and Biologics Compendium, as appropriate for its proposed use; and
3. Whether there are consensus opinions of national and local health care *providers* in the applicable specialty as determined by a sampling of *providers*, including whether there are protocols used by the treating facility or another facility, studying the same drug, device, medical treatment or procedure.
